

Clairvoyance

Which is to say “clear vision” seeing in the mind’s eye (subjective) or to see through the spiritual eye (third eye), objective. In the case of objective Clairvoyance, the viewer sees auras and energy centers, spirits, and other energy forms as if they were being seen in the physical plane with physical eyesight. Classified as retrocognition (past), premonition or precognition (future), and present—all irrespective of time and distance. Remember that time is a man-made means to measure and control in the physical plane. Of course, we are seeing beyond the physical dimensions and into other dimensions which are higher frequencies hence the term “second sight”. Consider visible light from the Sun (seen with the physical eye) and infrared which cannot be seen with the physical eye. An example would be your TV remote or other electronic remotes and many other higher frequencies of light seen through specialized equipment. There are variances or exceptions such as a rainbow or some light frequencies seen only in darkness or other special circumstances.

The Spiritual Third Eye is located between the eyes and slightly above them. Known as the Brow Chakra, and corresponds to the pineal gland located in the center of the brain. Considered as the path to the Seat of the Soul or higher consciousness, and linking us to the God source. In physiology, the pineal gland helps to vitalize the lower brain (cerebellum) and vision in the central nervous system. The Brow Chakra (Chakra-meaning “spinning wheel” in Sanskrit) is dark blue or Indigo and the element is light.

Clairvoyance is among the family of extended sensing such as Clairsentience a sister to Psychometry, due to use of the emotional center to receive information. Basically heightened and super sensitivity that is empathy without objectivity. A more finite term for empathy is Clairempathy—hence “empaths”. It is essential in being Clairsentient, to learn how to filter and shield oneself. Actually, this applies to all of the extended gifts or tools. There’s Clairaudience (audio), Claircognition (sudden knowing). Then there’s Remote Viewing which is an extension of several abilities to see and hear a situation or event at any distance and then to journal for confirmation. Tested by Universities, Military and researchers, remote viewing is utilized by many. Psychokinesis is the ability to move objects with the psychic mind. Mediumship, Channeling, Astral Travel, Reiki and other modalities of healing plus meditation, Angels, and Spirit Guides. These are just a few of the many extended abilities that we can explore and develop.
