The term “psychic” or known as the “sixth sense” or “intuition” is an integral and highly functioning aspect of our daily lives. The label or how we identify the “knowingness” does not matter, only that it exists at many levels of our being. Higher levels of our awareness and acceptance of the full spectrum of these senses, gives us a better grasp of a much broader reality—meaning our connectivity and vision to relate to the highest source and everyone, condition, and event in our lives.

Sometimes called ESP for Extra Sensory Perception or perhaps better said as *Extended Sensory Perception*. For indeed it is. Derived from the Greek letter psi referring to the spirit or mind or simply “self”. “Intuition” taken from Latin meaning “to look” or “to look in.” Dictionaries will define by stating that a knowing or learning comes to the mind without the use of reasoning or immediate apprehension or what we term “left brain” or “linear” thought processes of deduction or induction. Truly, there’s nothing supernatural or paranormal if we learn and accept the many forms of abilities within.

As we develop and inquire through literature and practice through these lessons, peace within comes to our essence of who we are and interaction in the world about us. There’s no requirement to align with any particular religion or spirituality based beliefs as psychic ability in all its forms, is a natural state of our being. Actually, many religions state clearly in their texts the forms or types of “gifts” that we have.

Think about it, there’s no limitation to time or space. Intuitive knowing comes to us regarding past, present or future events and distance too! Precognitive

dreams are an example of knowing in advance that a specific event will take place. Pay attention to your dreams, it is a message from *you* to *you* in most instances, and learn the symbolic messages. An example of a “present state” dream comes to mind of someone close to me. She had dreamed that a swarm of bees were around her head and that a man in a brown shirt came to help her. The interpretation was too much worry -- “busy bees” and the man in the brown shirt was **me** helping her not to worry too much because I was wearing a brown shirt when she called. How about having a sense that someone you know is thinking about you and the phone rings and you just know it is them. Or, you get the “urge” to call your friend, then they say that they’d just been thinking about you! Happens a lot to most of us. Universal energy is faster than electricity or electronics will ever be. That energy is within us and around us as we are all part of a larger energy field. That which we call God, Allah, The Universe, Creator, Highest Source, The Light or Presence is the energy or essence that permeates all the functions or actions of every one of us or substances, seen or unseen, on this planet and the other planets, galaxies beyond what we can understand. Understanding to be “one” with that energy through psychic development, extends or expands an awareness that allows us to live more fully and self-realized.

We’ll learn about Clairvoyance, Clairsentience, Clairaudience, Psychometry, Astral Projection, Dream interpretation, Symbolism, Spirit Guides, Auras, Meditation and discuss the facets of these and other modalities practiced by professionals and amateurs alike.

It is very important to note that there are no “Powers”, but the learning and use of natural abilities. If someone says that they have certain “Powers” and work to use their will, ceremonies, etc. on yourself or others, is a good opportunity for you to seek learning and consultation elsewhere. Think about it, the highest source of all interacts with billions of people on this planet (other planets too) and orchestrates all that we desire through our acts of creation as we are in alignment with the energy and love of The Source. Of course, all the elements of nature, planets and beings of every description as well. Whew!
